OBJECTIVE

Seeking an Associate Quality Assurance Engineer role to apply manual testing, API validation, defect tracking, test planning, automation testing, and release validation skills to improve software quality across web and mobile applications.

PROFESSIONAL SUMMARY

Quality Assurance Engineer with internship and coursework project experience in Manual Testing, Functional Testing, Regression Testing, Smoke Testing, API Testing, UI Testing, Mobile Testing, Defect Tracking, Test Planning, Release Validation, and Software Quality Assurance. Performed 120+ test cases, assessed 50+ REST API endpoints, identified and verified 100+ software defects, and supported Agile Scrum testing cycles. Built Selenium WebDriver and Playwright test scripts for academic web applications. Skilled in Postman, Jira, GitHub, SDLC, STLC, Cross Browser Testing, Test Metrics, Defect Density, Performance Testing, Load Testing, Security Testing, and Quality Control practices.

CORE COMPETENCIES

Software Quality Assurance, Manual Testing, Functional Testing, Regression Testing, API Testing, UI Testing, Mobile Testing, Performance Testing, Load Testing, Test Planning, Test Execution, Test Reporting, Requirement Validation, Defect Management, Bug Tracking, Bug Verification, Test Metrics, Root Cause Analysis, Continuous Testing,

SKILLS

Testing: Manual, Functional, Regression, API, UI, Mobile, UAT, Compatibility
Automation: Selenium WebDriver, Playwright, Test Automation, UI Automation, Automation Scripts
API Testing: Postman, REST APIs, Request Validation, Response Verification, Status Code Validation, API Test Cases
QA Process: SDLC, STLC, Agile Scrum, Test Planning, Test Execution, Defect Lifecycle, Release Validation, Test Documentation
Tools: Jira, Git, GitHub, Chrome DevTools
Technical: SQL, Java, JavaScript, ReactJS, NodeJS, ExpressJS, MongoDB

EXPERIENCE

Codelantic (Pvt) Ltd Aug. 2024 – Feb. 2025
Intern QA Engineer Sri Lanka
– Performed 120+ manual, regression, smoke, API, UI, and mobile test cases across 5+ application modules with 95% test execution coverage.
– Logged, tracked, and verified 100+ software defects using Jira, improving defect resolution efficiency and release readiness.
– Assessed 50+ REST API endpoints using Postman through request validation, response verification, schema checks, and status-code testing.
– Created 30+ test scenarios, test cases, defect reports, and release validation documents aligned with SDLC and STLC standards.
– Joined 15+ Agile Scrum activities including sprint planning, daily stand-ups, reviews, retrospectives, and QA reporting.
– Reviewed regression results, bug fixes, requirement coverage, compatibility issues, and release readiness before deployment cycles.
Academic QA Automation Project Work Coursework Projects
QA Automation and Software Testing Contributor SLIIT
– Built Selenium WebDriver scripts for login, registration, dashboard, form submission, and workflow verification scenarios.
– Created Playwright scripts for UI testing, navigation checks, form validation, and cross browser verification across academic projects.
– Automated 20+ repetitive UI validation scenarios, improving test consistency and reducing manual verification effort.
– Conducted API validation, regression testing, compatibility testing, and test reporting across 3+ academic systems.

ACADEMIC PROJECTS

Coursework projects completed as part of the BSc (Hons) Information Technology degree.

MomEra – AI Driven IVF Success Prediction | React Native, Expo, XGBoost Academic Project
– Tested mobile workflows including feature validation, UI responsiveness, usability scenarios, and API-based user journeys.
– Verified functional behavior, regression scenarios, defect fixes, and release readiness to improve application reliability.

SkillHorizon Learning Platform | ReactJS, Spring Boot, REST APIs Academic Project
– Built Selenium WebDriver automation scripts covering login, registration, dashboard, and user workflow validation scenarios.
– Implemented UI testing, navigation testing, form validation, and cross browser verification.
– Assessed REST API integrations and frontend functionality across multiple browsers and devices.

Smart Campus Management System | ReactJS, NodeJS, MongoDB Academic Project
– Prepared 15+ test scenarios and completed workflow verification for student and staff service request processes.
– Applied testing experiments for UI workflow verification and form submission scenarios.
– Reviewed frontend-backend integration, role-based access, REST API responses, and release testing scenarios.

PROFESSIONAL ACHIEVEMENTS

- Completed 120+ test cases covering functional, regression, API, smoke, UI, and mobile testing activities.
- Detected, tracked, and verified 100+ software defects using Jira and Agile QA processes.
- Assessed 50+ REST API endpoints using Postman through request, response, schema, and status-code verification.
- Built Selenium WebDriver and Playwright automation scripts covering 20+ automated test scenarios.
- Maintained test cases, defect reports, release validation records, test metrics, and QA documentation aligned with SDLC and STLC practices.

CERTIFICATIONS

- Introduction to Responsible AI – Google Cloud & Simplilearn SkillUp (2026)
- Selenium WebDriver Fundamentals
- Software Testing Concepts and Methodologies
- Introduction to Software Testing / Software QA
- React JS Tutorial – Great Learning Academy
- React Basics – Coursera

EDUCATION

Sri Lanka Institute of Information Technology (SLIIT)

BSc (Hons) Information Technology

2022 – Expected 2026

Sri Lanka

ADDITIONAL

Languages: Tamil, English

Soft Skills: Communication, Analytical Thinking, Problem Solving, Attention to Detail, Team Collaboration, Time Management
